

Weekly Report

Pingping Shang

2012.11.19~2012.11.25

Work in this week

I just realized a little portion of the wrangler system. Firstly, it can build table given a data file, and we can direct manipulate data. The problem is that I don't know how to order the data and then give suggestions. I feel self-contemptuous that I learn thing so slowly while others already have achieved so many gratifying results.

Plan for next week

I will go on realizing some functions and read papers about data transformation.
